About Us

Value Added Solutions, Inc. (VAS) is an Employee-Owned Small Business providing services to the U.S. Department of Energy (DOE) and its prime contractors. Established in December of 2005, VAS employees provide services in Technical Support Services; aiding our clients from our corporate office in Aiken, SC, and our Regional Offices in Oak Ridge, TN; Piketon, OH; Paducah, KY; Richland, WA; and Carlsbad, NM.

We offer small commercial and construction firms our on-site government contracting experience to help navigate companies through the contracting, heavy regulation-driven reporting, and submittal processes.

```
package com.ds.ucd.be.becore.solr;  
import ...  
public final class LocationUtils {  
    //...  
    // Parses Point from it's String rep  
    // @param locationString - String th  
    // @return org.springframework.data.  
    //...  
    public static Point parseLocation(Str  
        Preconditions.checkNotNull(locati  
        Preconditions.checkNotNull(locat  
        locationString = locationString.t  
        if (locationString.contains(",")  
            locationString = locationStrin  
        }  
        if (locationString.contains(",")  
            locationString = locationStrin  
        }  
        String[] location = locationString.  
        Preconditions.checkNotNull(locate  
        double lat = Double.parseDouble(locate  
        double lon = Double.parseDouble(locate  
        return new Point(lat, lon);  
    }  
}
```

Information Technology

VAS Technology Experts guide our clients through the sophisticated and ever-changing digital landscape in a broad spectrum of capacities. Our team plans, implements, secures, supports, and evolves systems to unlock potential and improve operational performance throughout an organization. We are experienced in implementing Technology Business Management (TBM) at Federal Facilities.

Data & Business Intelligence

VAS Database Architects are skilled in planning, developing and implementing the digital framework needed to support multi-organizational activities in multiple environments. Our Database Administrators have proven experience with data warehouse administration, cloud architecture, and business intelligence platforms. Our Business Analysts deliver in-depth and contextual insight into financial and operational data.

Cyber Security

Our certified Cyber Security Experts (CISSP, CISA, CISM, etc.) have in-depth knowledge of software quality assurance, intrusion prevention, penetration testing, auditing and process improvement. We offer implementation and monitoring of security appliances, intrusion detection systems, content filtering, and mobile device management platforms to detect and prevent attacks and data leaks.

System & Network Administration

Our System Administrators maintain and control numerous virtual and physical environments that house our clients' daily activities. Our Administrators offer invaluable expertise in disaster prevention and recovery planning for small and large organizations. VAS Network Administrators secure, maintain and improve the quality of information networks. Our help-desk teams assist end-users with application and system-related issues as well as initialize new users and equipment.
